OBJECTIVE

Dedicated front-end developer with expertise in React, Firebase, HTML, CSS, and Tailwind. Seeking opportunities to leverage my skills and contribute to dynamic projects. I aim to enhance user experiences through innovative and efficient web development.

SKILLS

Expertise: Tailwind CSS | React.js | Firebase | Tanstack Query | Responsive Design.
Comfortable: JWT | JavaScript | Material Ui | Stripe | Node.js | Express.js | mongoDB.
Tools: VS Code | Vercel | Surge | Netlify | Git | Github | Figma.

PROJECTS

MediCamp - Healthcare Event Registration Platform.   Explore | Blueprint | Backend Craft
Developed a dynamic medical camp website enabling users to role-based register and participate as Participants, Organizers, or Health Professionals. Implemented a role-based dashboard for Participants, Organizer, and Health Professionals to manage their dashboard.
Key Attributes:
- Secure payment integration using Stripe with payment history tracking.
- Organizer dashboard for managing camps, including add, update, and delete operations.
- Packing real-time data using the Tanstack query.

Utilized Technologies: Tailwind | React.js | Firebase | MUI | Node.js | express.js | MongoDB.

Writes World - Blogging Platform.   Explore | Blueprint | Backend Craft
Developed a responsive personal blogging platform where users can register, create, and manage blogs. Implemented features like wish lists, preventing bloggers from commenting on their own blogs.
Key Attributes:
- User authentication and secure blog management with Firebase and JWT.
- Interactive blog features with React, displaying blogs in ascending order.
- Wish list functionality for users to save and manage blogs for later reading.

Utilized Technologies: Tailwind | React.js | Firebase | MUI | Node.js | express.js | MongoDB.

MeetWave - Video conferencing platform(Team Project).   Explore | Blueprint | Backend Craft
Key Attributes:
- Seamless collaboration and intuitive features for enhanced teamwork.
- Extensive meeting control capabilities ensuring smooth administration.
- Enhanced engagement through unique interactive functionalities.

Utilized Technologies: Tailwind | Next.js | Firebase | MUI | Node.js | express.js | MongoDB.

EDUCATION: Bachelor of Business Studies from National University. Duration: 2021-Running

COURSE: Completed front end web development course from Programming Hero.
